WORK EXPERIENCE

Forward Deployed Engineer

Aug 2025 - May 2026

Marhaba Group of Companies

Newark, New Jersey, USA

- Led 10 person team to ship M1 Shipping, a GPT-5 load-sequencing engine, cutting manual resolution time by 60% via Python microservices and Copart API integration deployed to production across US and UAE warehouses.
- Spearheaded vehicle location management by building Python VIN scan pipeline across 12 warehouses, improving load times by 25% through collaboration with operations.
- Deployed 15+ REST integrations for vehicle bidding and transactions, enabling 500+ daily transactions, reducing bottlenecks by 40% through autonomous API design.
- Improved API latency by 45% and incident recovery by 30 minutes through PostgreSQL query optimization and Vercel deployments on Supabase infrastructure across 5 endpoints.

Associate Software Engineer

Dec 2022 - Jul 2024

Holisol Logistics Pvt. Ltd

New Delhi, India

- Designed HoliConnect BLE, a MongoDB, Express.js, React, Node.js based warehouse management system on Raspberry Pi SaaS gateways, shipping with 5 person team to ingest 100+ events per hour and track 200+ workers across 3 facilities, directly solving warehouse visibility challenges.
- Launched Logiastro platform end-to-end, a Next.js solution optimizing 500+ last-mile deliveries, reducing delivery time by 22%, engaging directly with operations leadership.
- Resolved critical BLE telemetry corruption by taking ownership of the issue, building event based processing with MongoDB reconciliation, restoring 99% data integrity with zero data loss.
- Authored 30+ REST endpoints in Node.js and Prisma using Distributed Systems patterns, processing 10000+ events daily across 5 platforms, making autonomous architectural decisions without blocking stakeholders.
- Shipped full-stack features across 15+ projects, cutting feature delivery time by 35% through streamlined architecture while coaching junior developers and owning the entire delivery pipeline.
- Fixed critical production cron failures with zero-downtime Docker migration, recovering 2+ months of corrupted reporting data and preventing future incidents through process improvements.
- Managed CI/CD infrastructure on Kubernetes clusters and GitLab pipelines, releasing 10+ production updates monthly with 100% uptime deployments across 3 production environments, driving automation and mentoring the team.

Full-Stack Engineer

Oct 2021 - Nov 2022

Summerhill Technologies Pvt. Ltd

Shimla, Himachal Pradesh, India

- Took ownership of Python and Django development for Takeiteasy, collaborating directly with product and operations teams to enhance operational efficiency by 25% across 3 departments, reducing manual workflows by 40%.
- Engineered CI/CD pipelines with Terraform and Docker for 10+ Microservices, cutting deployment time from 30 to under 5 minutes, enabling 2x faster releases by adopting automation practices.
- Rebuilt Filuet.com using Content Management System for a 19 market 3PL multinational, delivering 100% cross-device compatibility by working with design and stakeholders, reducing load times by 32% and earning client satisfaction.

PROJECTS

Shelby Autonomous Personal AI Agent

- Engineered Shelby, a 24/7 AI agent handling 50+ daily tasks, integrating Claude Opus and RAG with 15+ tool integrations using LLMs and Model Context Protocol for autonomous tool orchestration, with Langchain for semantic memory and skill routing across Gmail, Google Calendar production systems.

Chest X-Ray Multi-Label Detection

- Assessed and implemented image classification model using PyTorch and Scikit-learn in Jupyter Notebook, processing 100GB+ of image data with data augmentation to achieve 88%+ F1 score on 14 chest pathology labels.

Cats vs Dogs Image Classification

- Built convolutional neural network for binary image classification, implementing data augmentation and regularization techniques to achieve 90%+ validation accuracy on 5000+ test images.

SKILLS

Programming Languages: Python, Go, JavaScript, TypeScript, SQL, Bash, Rust

Frameworks & Libraries: Node.js, Express, React, Next.js, REST, GraphQL, Microservices, Distributed Systems, Event Driven Architecture, LLM Agents, Retrieval Augmented Generation (RAG), Prompt Engineering, GenAI, PyTorch, TensorFlow, Kafka, n8n, Model Context Protocol(MCP), Langchain

Databases: PostgreSQL, MongoDB, Supabase, Prisma, Query Optimization

Tools & Software: VS Code, Jupyter Notebook, Tableau, Figma, Jira, Postman, Agile Scrum, CRM, SaaS

Cloud Platforms: Docker, Kubernetes, AWS Lambda, AWS, Linux, Vercel, CI and CD Pipelines, Cloud Architecture, Git, GitLab, Terraform

CERTIFICATIONS & ACHIEVEMENTS

- Retrieval Augmented Generation (RAG) - deeplearning.ai Jun 2026
- Non-Human Identity Fundamentals Certified Professional - Oasis Security May 2026
- Big Data, Artificial Intelligence, and Ethics - University of California, Davis Aug 2024

EDUCATION

Montclair State University

Master of Science, Computer Science & AI

Sep 2024 - May 2026

Punjab Technical University

Bachelor of Technology, Computer Engineering

Aug 2019 - Jun 2023
