SUMMARY

Fullstack Software Engineer experienced in distributed systems, event-driven microservices, and LLM-integrated applications across TypeScript/Python, PostgreSQL, and Kubernetes on AWS. Currently engineering Shelby AI, an agentic Claude-API system with tool-use orchestration, semantic memory, and skill routing to automate multi-channel task execution. Completed academic work on multi-label chest X-ray classification as part of CSIT 599 at MSU.

TECHNICAL SKILLS

- Languages:** Python, TypeScript, JavaScript, SQL, Go, Bash
- Backend & APIs:** Node.js, Express, FastAPI, REST, GraphQL, Microservices, Distributed Systems, AWS Lambda, Event-Driven
- Frontend:** React, Next.js, Redux, HTML5, CSS3, Tailwind, Component Architecture
- Cloud & DevOps:** AWS, Docker, Kubernetes, Linux, Vercel, CI/CD, GitHub Actions, Observability
- Databases:** PostgreSQL, MongoDB, Redis, Prisma, Supabase, Query Optimization, Data Modeling
- AI & ML:** Claude API, OpenAI API, LLM Agents, Tool Use, Prompt Engineering, RAG, n8n, PyTorch, Scikit-learn
- Tools:** Git, GitLab, Jira, Postman, Agile Scrum, TDD, Performance Tuning

PROFESSIONAL EXPERIENCE

- Marhaba Group of Companies (M1 Shipping)**
Software Engineer (Co-op)

Newark, NJ, USA
Mar 2025 – May 2025

 - Owned end-to-end delivery of M1 Shipping’s logistics SaaS in TypeScript, Python, Supabase, Vercel, replacing manual vehicle-intake in 2 warehouses and supporting 100+ weekly transactions over 12 weeks.
 - Delivered 15+ REST APIs for vehicle bidding, transaction validation, workflow automation, reducing per-operator handling time by 20–30 min daily.
 - Tuned PostgreSQL queries and refactored backend processing on 5 high-traffic paths, reducing median API latency by ~45%.
 - Implemented centralized logging and monitoring on Kubernetes Linux services, lowering mean-time-to-resolution by ~30 minutes.
 - Automated Python reporting pipelines for operations, eliminating ~40% of weekly manual reports.
- Holisol Logistics Pvt. Ltd**
Software Engineer

New Delhi, IN (Remote)
Jul 2023 – Jul 2024

 - Architected HoliConnect BLE, an IoT telemetry platform on Raspberry Pi gateways ingesting 1K+ events/hour from edge devices to monitor 200+ warehouse workers.
 - Containerized BLE ingestion services with Docker and deployed to a Kubernetes cluster on AWS, enabling horizontal scaling and zero-downtime rollouts on 3 platforms.
 - Diagnosed corruption in the BLE telemetry path and created a reconciliation pipeline backfilling from a clean MongoDB backup, restoring ~99% event integrity on 3 platforms with zero data loss.
 - Authored 30+ REST APIs in Node.js, Express, Prisma backing 3 platforms — PostgreSQL for transactional workloads, MongoDB for high-volume telemetry.
 - Shipped Logiastro, a last-mile delivery routing platform on Next.js, PostgreSQL, Prisma, Vercel, using OpenAI and Google Places APIs to dynamically reroute drivers around live disruptions on 500+ deliveries.
 - Resolved a production cron failure in HoliHealth (MERN warehouse app), corrupting 2 months of leadership reports; restored the cron and migrated clean staging data with zero downtime.
- Holisol Logistics Pvt. Ltd**
Software Developer Intern

New Delhi, IN (Remote)
Dec 2022 – Jun 2023

 - Developed Python barcode-scanning and data-capture tools, trimming hand entry by ~45% in 3 internal systems.
 - Contributed full-stack features in React, Node.js, SQL within Git-based Agile cycles, lifting sprint predictability ~20%.
- Summerhill Technologies Pvt. Ltd**
Software Developer Intern

Shimla, IN
Dec 2021 – Nov 2022

 - Launched filuet.com on WordPress using HTML, CSS, JavaScript, jQuery, improving Lighthouse responsiveness scores by ~35% and lifting user engagement by ~30%.

PROJECTS

- Shelby — Autonomous Personal AI Agent** | *Claude API, Tool Use, FastAPI, Telegram/WhatsApp*
- Crafted an always-on Claude-API agent with a heartbeat loop, 2-tier memory, 5+ plugin skills, 2 channel adapters, holding context over days.
- Automated Job-Search Pipeline** | *n8n, OpenAI API, Google Sheets, Gmail API*
- Engineered 8+ n8n workflows scraping and ranking ~200 listings/day from 5 boards, auto-tailoring resumes via LLMs and producing applications in under 60 seconds.
- Chest X-Ray Multi-Label Detection** | *PyTorch, Scikit-learn, Transfer Learning*
- Trained a deep-learning pipeline on 100K+ chest X-ray images over 14 lung conditions, boosting weighted F1-score by ~20% via transfer learning.
- Cats vs. Dogs Image Classification** | *PyTorch, CNN, Data Augmentation*
- Constructed a CNN classifier in PyTorch on the 25K-image Cats vs. Dogs dataset, reaching 90%+ validation accuracy via augmentation and regularization.

EDUCATION

- Montclair State University**
Master of Science in Computer Science — GPA: 3.3/4.0

New Jersey, USA
Sep 2024 – May 2026
- I.K.G Punjab Technical University**
Bachelor of Technology in Computer Engineering — GPA: 3.8/4.0

Jalandhar, India
Aug 2019 – Jun 2023
