Experience

Marhaba Group of Companies

Newark, New Jersey, USA

Software Engineer

Jul 2025 to May 2026

- Resolved 100+ vehicle congestion and container loading issues by integrating M1 Shipping with the Copart API using Python, demonstrating scalable architecture across US and UAE production environments.
- Optimized vehicle location management through a Python VIN scan and QR assignment pipeline across 12 warehouses, improving loading times and accuracy by 25% through enhanced software engineering.
- Deployed 15+ critical REST API integrations for vehicle bidding and transaction validation, directly impacting product strategy for workflow automation efficiency.
- Improved application performance by optimizing Supabase database queries and Vercel deployments, reducing median API latency by 45% and incident recovery time by 30 minutes across five high-traffic endpoints.

Holisol Logistics Pvt. Ltd

New Delhi, India

Associate Software Engineer

Nov 2021 to Jul 2024

- Architected development of HoliConnect BLE, a MERN stack based warehouse management system on Raspberry Pi gateways, ingesting over 100 events per hour from edge devices to provide full shift-level visibility for 200+ tracked workers.
- Directed Logiastro, a fully functional Full stack Next.js platform for last-mile delivery services, optimizing routes for over 500 deliveries by integrating the OPENAI API with the existing backend infrastructure.
- Diagnosed corruption in the BLE telemetry pipeline and developed a MongoDB-based reconciliation service that restored 99% event integrity across three production platforms with zero data loss.
- Authored 30+ REST API endpoints in Node.js and Prisma, translating business requirements into functional integrations for 5 platforms with PostgreSQL for transaction processing.
- Implemented full-stack development using React, JavaScript, and Python frameworks, embedding SQL and MongoDB database features across 15+ internal and 3+ client-facing projects, driving technical execution, mentoring developers, and ensuring successful project delivery.
- Identified the root cause of critical production cron failures in a Laravel warehouse application and guided the team to implement a zero-downtime staging migration and pipeline restoration, recovering 2 months of corrupted reporting data.

Summerhill Technologies Pvt. Ltd

Shimla, Himachal Pradesh, India

Full-Stack Engineer

Mar 2020 to Oct 2021

- Led a Python and Django tool for Takeiteasy while collaborating closely with product management teams, enhancing the efficiency of operational processes by 25% across 5 departments.
- Engineered robust CI/CD pipelines involving OS configurations that automated build processes for 10+ microservices, cutting deployment times down to under 5 minutes while improving team collaboration.
- Redesigned and shipped Filuet.com, the public web presence of a 19-market 3PL e-commerce multinational, from Figma to production with full ownership of responsive implementation and cross-device QA.

Technical Skills

Languages: Python, Go, JavaScript, TypeScript, SQL, Bash

Backend: Node.js, Express, REST, Microservices, Distributed Systems, AWS Lambda, Event Driven Architecture

Frontend: React, Next.js, HTML5, CSS, Tailwind, Component Architecture

Cloud & DevOps: AWS, Docker, Kubernetes, Linux, Vercel, CI and CD Pipelines, Cloud Architecture

Databases: PostgreSQL, MongoDB, Prisma, Supabase, Query Optimization

AI & ML: LLM Agents, Agent Architectures, Retrieval Augmented Generation (RAG), Prompt Engineering, GenAI, n8n, PyTorch, TensorFlow

Tools & Practices: Git, GitLab, Jira, Postman, Agile Scrum, CRM, GraphQL, VS Code, Jupyter Notebook, Tableau

Projects

Shelby Autonomous Personal AI Agent

Claude Opus API, Tavily API, ElevenLabs API, Tool Use, FastAPI

- Engineered Shelby, an OpenClaw based 24/7 AI assistant, integrating Claude Opus and RAG for advanced LLM agent capabilities, enabling seamless interaction with complex production systems.

Chest X-Ray Multi-Label Detection

PyTorch, Scikit-learn, Transfer Learning

- Designed and implemented comprehensive procedures for image classification models, integrating PyTorch and Scikit-learn to process gigabytes of image data, augmenting datasets for 90%+ validation accuracy.

Cats vs Dogs Image Classification

PyTorch, CNN, Data Augmentation

- Built a convolutional neural network for image classification, augmenting data and implementing regularization to achieve 90%+ validation accuracy with a focus on data security in model training.

Education

Montclair State University

M.S. in Computer Science

New Jersey, USA

2024-2026

I.K.G Punjab Technical University

B.Tech in Computer Engineering

Jalandhar, India

2019-2023
